Dear Leading Edge Online Member,

Here's something interesting ....

**Lunar Mining / Occupation of the Moon By Humans and Others**

*The Moon:* Occupied by Humans and others, with mining since the late 1960's. Part of the real space program, which also, according to interviews with Lear, occupy Mars, which allegedly has 600 million people on it who look just like us. Of course, the whole NASA thing is for public fodder, to cover what it really going on. Part of what is going on has been lunar mining. No doubt they are mining on Mars, as well. No doubt the pictures of various ships in orbit around the Earth have to do with part of the real actuality going on here.

The most interesting **background** on this is from a series of videos that are on YouTube referencing an Interview on Coast to Coast AM radio with George Noory, John Lear and Richard Hoagland.

The interview is broken up into 12 video segments: 1 2 3 4 5 6 7 8 9 10 11 12

The interview talks about structures on the Moon, dates, background. Interesting stuff. Worth listening to all of the segments. Ultimately, Lear remains a lightsider, just like Icke, but there is a lot of information here.

Val

**PS.** I have made the Lear Photos he supplied to George Noory available on Leading Edge in several PDF Files (You will like these: [Page One](#), [Page Two](#), [Page Three](#)) They are better than the ATS files, but the ATS files serve as raw material for examination, if nothing else (see further down on the page)

Recall a recent LE Online Update on the new 2nd level page on the IRIS system. **THE LIVING MOON -The Enigmas on the Moon** link is in there with others on the 2nd Level page of the IRIS system on the LE Online, which includes links also relating to Mars and artifact structures, life and activity. **COLOR PHOTOS OF MOON** (NICE)

**The Interview on Coast to Coast AM:**

Former aviation pilot John Lear (his website that discusses this is called The Living Moon) discussed photographic evidence for cities and mining operations on the moon. He said that mining operations for such substances as helium-3 have been going on for years, and that antigravity ships, secretly launched from Antarctica, arrive at the moon in only one hour's time. He cited a Above Top Secret website poster known as "sleeper" ([blog](#)) at the abovetopsecret.com forum as one of the sources for his information.

Lear also argued that the moon was towed into its current orbit by a huge electromagnetic vehicle, and that vehicle can be seen in a photo taken of the moon crater Tsiolkovsky. He also believes that the moon contains a breathable atmosphere, as evidenced by photos showing smoke or vapor coming from the surface.
Joining the conversation during the third hour, Richard C. Hoagland concurred with Lear that there are artificial structures on the moon, yet he suggested they may be ancient rather than new. If there is mining that is taking place there, it could be for the "retro-engineering of ancient technology," said Hoagland, who added that he does not think the photographic evidence supports the notion that the moon has an atmosphere. During the last hour, Lear took questions from the listeners.

John Lear's Moon Pictures on Above Top Secret

At long last, the FULL QUALITY, HUGE FILE SIZE, moon images John Lear had scanned into his computer by Bob Lazar many years ago are online here at AboveTopSecret.com, the NUMBER ONE destination on the web for the CIVIL discussion and collaborative research of EVERYTHING "Alternative".

From what John has told me and what I see in these files, this is a wide angle, original black and white NASA photograph split into 5 separate files when Bob Lazar scanned it.

Technical Data:

Four of them labeled Copernicus 1 through 4 are from Lunar Orbiter 2 H-162; Spacecraft Altitude 45.9 kilometers, camera tilt 69°20'; Frame Center Data: LAT: 5°30'N, LONG: 20°00W, sun elevation 24°40'. Framelet Bearing: N86°40'W.

This first batch are the huge, best quality, full size images, if you have a dial up connection be prepared for a long download.
